

Proctoscopes

choice of size and type for clinical preference

The Stericom range of proctoscopes offers a choice of sizes and geometries to suit all normal clinical needs. These scopes are made from clear toughened polystyrene for optimal visibility and are compatible with the **Ecolite** lighting system. No inconvenient battery removal/disposal is required following the procedure and only combustible polystyrene is disposed of as clinical waste, offering the most eco-friendly and lowest-cost option available to comply fully with MHRA MDA2010/060.

The range includes small/paediatric designs, the unique atraumatic *Blu-Scope* design in two sizes, and large 23mm diameter operative flute-ended & trunk-ended variants for maximum versatility.

- ***guaranteed atraumatic***
- ***choice of size***
- ***choice of flute or trunk end***
- ***choice of introducer***
- ***transparent polymer/ latex-free***
- ***disposable***

SMA4018

Small, flute-ended with 18mm diameter ideal for routine examination and paediatric work

Length= 56mm Diameter = 18mm

SMA4019

The trunk-ended companion to the SMA 4018

Length= 54mm Diameter = 18mm

SMA4021

The atraumatic *Blu-Scope Midi* is the ideal proctoscope for all routine outpatient work, fitted with an extra-long introducer to enable easier withdrawal

Length= 70mm Diameter = 21mm

SMA4022

The big brother to the SMA 4021, the *Blu-Scope Maxi*, is a favourite in the Stericom range, ideal for operative work and offering unrivalled ease of access for biopsy forceps, haemorrhoid banding ligators and phenol syringes. A longer introducer offers atraumatic insertion to the patient and ease of withdrawal from the scope barrel

Length= 79mm Diameter = 23mm

SMA4023

This 23mm diameter flute-ended proctoscope is the ideal design for operative work such as the treatment of haemorrhoids; it enables the bowel wall to be effectively retracted whilst carrying out the procedure on the opposite side of the anal canal

Length= 88mm Diameter = 23mm

SMA4024

SMA 4024 The trunk-ended brother of the SMA 4023: with a 23mm diameter and short 65mm barrel, this is our most popular and versatile proctoscope

Length= 65mm Diameter = 23mm
