

2-Lumen Cystometry Catheters in PVC for Urodynamic Investigations

Stericom's range of 2-lumen cystometry catheters offers the urodynamics practitioner a choice of designs, Ch sizes & lengths according to clinical need. The design of the 2-lumen main tubing devotes 30% of the cross-sectional lumen to pressure transmissions with minimum intra-lumen interference, and 70% to filling (fill-rate via peristaltic pump of >100ml/minute).

Blue-tinted Ch4.5 pressure lines correspond with the main tube lumen, and at 1400mm long enable direct connection to the pressure dome. There is no need for additional extension lines, so removing the elevated infection risk associated with multiple connections. Translucent tinted, winged female luers are fitted to the pressure and filling lines.

Ch6 & Ch8 PVC Catheters with translucent tubing & Cathfix® (UDC 3716 & 3718)

These premium PVC catheters are available in both Ch6 & Ch8 sizes. The cm-marked, translucent 550mm main 2-lumen tube enables easy identification of air bubbles in the line. Ch8 is blue tinted, Ch6 green; each divided 70% for filling and 30% for pressure transmission. Stericom's patented Cathfix® connector is employed to enable easy attachment to the patient. The 1400mm long Ch4.5 blue-tinted pressure line, and 150mm Ch5 clear filling line, each end in a winged and colour-coded female luer.

UDC 3716

Ch6 & Ch8 PVC Catheters with opaque tubing & barrel connector (UDC 3726 & 3728)

These catheters are available in both Ch6 & Ch8. The extra-long 700mm main 2-lumen tube is opaque: Ch8 is blue, Ch6 is green, divided 70% filling and 30% pressure transmission. An injection-moulded barrel connector is used for the bifurcation junction. The 1400mm long Ch4.5 blue-tinted pressure line, and 150mm Ch5 clear filling line, each end in a winged and colour-coded female luer.

UDC 3728

2-Lumen Cystometry Catheters in PVC for Urodynamic Investigations

UDC 3716 & 3718

- Both Ch6 (UDC 3716) and Ch8 (UDC 3718) available
- 550mm long tinted and translucent 2-lumen main tubing
- Main tubing is marked in cm, and colour-coded according to Ch size: green tinted for Ch6, blue tinted for Ch8
- 70% of lumen cross-section devoted to filling enables fill rate of >100ml/minute when pump-assisted
- 30% of lumen cross-section devoted to pressure measurement corresponds closely with Ch4.5 pressure line, for strong pressure transmissions and minimum intraluminal interference
- Patented Cathfix® bifurcation connector enables easy connection to the patient
- Ch4.5 blue-tinted pressure lines are 1400mm long, enabling direct connection to the pressure dome: no extension set needed
- Pressure and filling lines each fitted with winged and colour-tinted female luer
- Manufactured to comply with ISO13485:2003, MDD93/42/EEC, CE-marked

Available in

- Box of 25, individually peel-pouched, sterile

UDC 3726 & 3728

- Both Ch6 (UDC 3726) and Ch8 (UDC 3728) available
- Longer 700mm opaque 2-lumen main tubing suitable for all patients
- Main tubing is colour-coded according to Ch size: green for Ch6, blue for Ch8
- 70% of lumen cross-section devoted to filling enables fill rate of >100ml/minute when pump-assisted
- 30% of lumen cross-section devoted to pressure measurement corresponds closely with Ch4.5 pressure line, for strong pressure transmissions and minimum intraluminal interference
- Barrel connection at bifurcation keeps cost lower
- Ch4.5 blue-tinted pressure lines are 1400mm long, enabling direct connection to the pressure dome: no extension set needed
- Pressure and filling lines each fitted with winged and colour-tinted female luer
- Manufactured to comply with ISO13485:2003, MDD93/42/EEC, CE-marked

Available in

- Box of 25, individually peel-pouched, sterile

order code	description	catheters per box
UDC 3716	2-Lumen Cystometry Catheter Ch6, PVC With 550mm translucent green tubing & Cathfix®	25
UDC 3718	2-Lumen Cystometry Catheter Ch8, PVC With 550mm translucent blue tubing & Cathfix®	25
UDC 3726	2-Lumen Cystometry Catheter Ch6, PVC With 700mm opaque green tubing & barrel connector	25
UDC 3728	2-Lumen Cystometry Catheter Ch8, PVC With 700mm opaque blue tubing & barrel connector	25
